-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 February 2006.

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Embodiment 3 (fig. 15) of claim 4 in the reply filed on 2/13/2006 is acknowledged.

Specification

2. The abstract of the disclosure is objected to because the numbers contain in the abstract. Correction is required. See MPEP § 608.01(b).
3. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
4. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
6. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Line 6, the limitation "the external electrodes" renders the claim indefinite. It is not clear where the external electrodes come from.

Lines 9-10, the limitation "a plating containing no tin is applied to the terminal electrodes of the chip component" renders the claim indefinite. It is not clear that "a plating containing no tin" is an additional element applied to the terminal electrode or "a plating containing no tin" is a material that formed the terminal electrode (see specification page 17 for details).

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

8. Claim 4, as best understood, is rejected under 35 U.S.C. 102(e) as being anticipated by Okabe et al. [U.S. Pat. 6,889,431].

Okabe et al. (fig. 2H, cols. 8-9) discloses a hybrid integrated circuit provided with:
a chip component (45) with terminal electrodes formed at both ends, conductive wiring layers (14a, 15a) in which plurality of pads are provided in a manner corresponding to the terminal electrodes, an overcoat resin (24) for covering the

Art Unit: 2814

conductive wiring layers (14a, 15a) excluding the pads, and the terminal electrodes electrically connected to the conductive wiring layers (14a, 15a).

Conclusion

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoai v. Pham whose telephone number is 571-272-1715. The examiner can normally be reached on M-F.
10. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wael M. Fahmy can be reached on 571-272-1705. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
11. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
